**Phone No:** +90 (539) 119 11 63

Nicosia / TRNC

## OBJECTIVES

**Contract Type:** Full-time Employment

**Open to:** On-Site, Remote and Hybrid Positions

**Location:** Nicosia, TRNC

## EXPERIENCES

### Uluslararası Kıbrıs Üniversitesi

August 2024 - Present

- Created and maintained robust software solutions using Laravel (PHP), SQL, on Ubuntu.
- Ensured software reliability and performance, contributing to the university's digital infrastructure.
- Focused on user-friendly interface design, intuitive navigation, and efficient database design to enhance overall software usability.
- Part of a dynamic team of developers, effectively using GitLab for version control and issue management.
- Contributed to designing and developing user-friendly interfaces for various internal projects, ensuring seamless integration and functionality.

### Freelance

April 2020 - Present

- Developed robust REST APIs utilizing MySQL and Laravel/PHP
- Delivered tailored solutions for diverse client needs, ensuring usability, performance, and scalability.
- Integrated intuitive user interfaces with optimized backend systems to provide seamless digital experiences.
- Effectively collaborated with clients to transform business requirements into functional, user-friendly platforms.

## PROJECTS

### Harbeli Bilişim

#### Maintenance & Rebuild

- Performed periodic maintenance and updates on the existing WordPress website.
- Developed a custom import method to streamline product additions.
- Rebuilt the entire website from using Laravel (PHP) and MySQL, based on client requirements.
- Implemented an automated migration process to transfer data from the old WordPress site to the new Laravel-based system.

## **Echt Zorg Travel**

### **Build & Maintenance**

- Built the website from scratch using Laravel (PHP) and MySQL.
- Designed and implemented as a mini CMS to allow flexibility and scalability.
- Developed an admin panel enabling the client to fully manage and control every aspect of the website.
- Integrated email, SMS, and Telegram notification systems for enhanced communication.
- Implemented a CI/CD pipeline to ensure smooth and continuous deployment, keeping the system up to date with frequent changes.

## **Levent School**

### **Member of the team**

- Created a comprehensive end-user documentation covering the full usage of the system, since I joined the project at a later stage.
- Implemented bulk import functionality to migrate existing personnel data from CSV and XLSX files.
- Developed automated document and form generation features required by the school.
- Tech stack: Laravel, MySQL, JavaScript.

---

## **SKILLS**

- Solid understanding of HTML5, CSS
- Solid understanding of PHP (Laravel)
- Experience in OOP
- Experience in relational and non-relational databases
- Experience in working with REST APIs
- Experience with TDD
- Experience with CI/CD approach and implementation
- Experience working in cross-functional team with agile methodologies
- Experience in Linux based operating systems
- Experienced in version control and collaboration tools, including Git, GitLab and GitHub.
- Familiar working with Docker
- Familiar with Redis (In memory DB)
- Familiar with React JS, Vue JS
- Familiar with .NET
- Following KISS, SRP, ACID and Clean Code approaches
